Garden sauna electrician brief

Before you order, write down the exact equipment variant and attach a dated sketch showing where the sauna will stand. Ask the electrician to confirm the design and next actions.

Site and brief revision

Postcode, date, owner, sketch reference and proposed enclosure location.

Equipment model codes

Enclosure, heater or infrared cabin, controller, sensors, lights, pump and options.

Manual revision

Identifier, revision, source and date for every offered model.

Intended environment

Heated, dry, outdoor and wet areas. Record suitability evidence and proposed controls location.

Source ratings and variants

Manufacturer-rated power and documented phase or voltage options. Note unresolved conflicts.

Other loads and operation

List other devices and any remote controls. What else in the house will draw power at the same time?

Service-route sketch

Attach a sketch showing the proposed route, entry, exposure and site constraints.

Property supply assessment

Electrician records available capacity, accepted configuration and any design action.

Responsibilities before order

Who handles the work inside, the cable route and the final connection? Record the next action and its deadline.
